

A day of perfection is coming: 08/08/2008

Whether it will see the arrival of bliss and paradise or an increasing of world class hatred and wars, whether of mass disease or sudden release of super world health is anyone's guess. I do not pretend to know which. However, when I looked at the calendar recently I saw something lining up that I kind of figured everyone would want to know about ahead of time => a mathematical "Base 2" alignment of such awesome and astronomical precision it approaches scary.

August 08 2008 is that Date: $08/08/2008 = 02^3/02^3/2^1 00 2^3$ which then further broken down equals $2 \times 2 \times 2 \ 2 \times 2 \times 2 \ 2 \times 1 \ 2 \times 2 \times 2 = 10$ #2's in a row... the Date broken down into powers of two = 10 times... while of course the number 10 is the Base 10 number. I am not into astrology nor numerology but if I'm not mistaken a Base2~Base10 agreement like this does not just happen every day.

The binary system (0-1) working out to agree with the decimal system (0-9) is surely unique to happen on anyone's calendar of any Age (epoch).

What do I expect on August 08 2008? Something ooh Biblical?

I do not expect Armageddon to start. It is noteworthy that the 8th of August 2008 is a Friday so for those of you who figure Saturday to be the true Sabbath of every week, hmm. August 09 2008 could turn out to be a sort of "walk into freedom" like when the Israelites walked out of slavery. I do not expect something that grandiose to happen but what I do expect is some degree of "great enlightenment" to be revealed to all mankind.

Some hidden knowledge or revelation or understanding? ufo's, energy?

A walk into freedom might in actuality be a walk out of ignorance.

I prefer to deal with facts, not speculation, so while I could

extrapolate this subject into some pronouncement of

awful cataclysm I do not feel a need to go there.

Looks like a good day to end a truth embargo if in fact such even exists.

God bless your efforts and in the days to come.

WM Riley Thanks for your time today, 06-26-2008
