

2007-12-18 | December 18, 2007 Report:

Telling the Truth about Anti-Gravity,

by Woodrow Riley from a non-scientist new timeline view

Anti-Gravity, a phrase we have been hearing so long we doubt it can ever be achieved. The Hollywood movie industry, the comic book industry, and even the Science industry, have held this in front of our face for over a **CENTURY**.

Will “true” anti-Gravity Energy ever be discovered? I do not think so, for good reasons. The scientific and electronics people understand the flow of electricity and its behaviour to a depth most do not. Given that fact, if anti-Gravity was “discoverable” we would have it now and, the longer we go day by day further down the pike without it begins piling more evidence that my conclusion is correct.

A conclusion you have likely already drawn for yourself. However, there are other ways to have anti-Gravity besides “true” anti-Gravity. Airplanes and anything else having wings is doing it but they are motion-dependent angular attack flight that depends on an atmospheric soup to work. That is the worst kind of anti-Gravity because birds, planes & dirigibles are known to fall from the sky any old time they want, killing everyone on board usually.

Our vaunted Science has fallen flat on its face when it comes to anti-Gravity, and they know it. They know that talking about it and failure to deliver it (and the “flying cars”) is **a Major Stain on their record** that threatens to smear them to the entire World. In other words, not delivering anti-Gravity has begun to become a negative Public Relations hammerthrow that comes home.

If however an upward force was created powerful enough to overcome Gravity's downward pull, you would have liftoff. NASA will never do it with propulsion space launch systems because of #1 the heavy fuel plus #2 the superheavy metal tanks holding the megatonnage fuel makes NASA'S anti-Gravity a distant failure already written. Then, once you add all that weight add the propulsion engines also; their increased weight. NASA is trying to raise all that albatross aloft.

It just is not going to happen. However, both Nikolai Tesla and myself have two separate systems ~that are somewhat also similar btw~ but Tesla died in like 1943 or 46 w/out revealing it 100%. I believe I have figured it out, not because I am some “great brain” but because I made my engine first, which then enabled me to see deeply into and understand how two of Tesla's major “lost engines” work. So I actually have two separate engines that produce an “upward force positive” thrust... that I believe to be doable right now. Both of them, in just a few short years of development.

There are reasons why my many engines are sitting on a shelf and not being worked on. Basically the world governments are afraid of a Public that has flying cars or lightweight flying homes i.e. **an energy cost freed Free Public** that would be completely Gravity-mobile. They are in fear of losing control of both you and your purse. You see, my anti-Gravity engine is based on the design of my Millennial Dawn metal ball dual waterwheel engine that makes excess electricity to power your home and cars and everything else. It was invented on February 15 2005, an outgrowth of my engine that uses air and water as **“Physics Fuel”** (sort of => air charged with compression-cold energy at 4000 psi, adding the water in steam ~charged with heat energy~ the two being dually injected into the engine cylinder, **exploding without combustion or polluting by-products**) =>

(shortcut to a long-name pdf about the Millennial Dawn engine.) And if you read this page => where I wrote a long time ago about [the closeness of human colonization of Outer Space](#) you will see I am no flash in the pan. Industrial Age 2 non-polluting engines are Moses-now real, ready to be built & split Outer Space wide open to the human race when we start believing, listening, doing right.

All the pieces of the puzzle, just waiting to be assembled, but because this world has become so Evolution-believing and hates my strong Bible beliefs, and because I have stated that many of my inventions have come to me by inspiration from above, the people holding all the purse strings ~the purse that in reality is filled with your hard-earned tax monies~ the monies have been purposely worked away from my hands. **The Energy Crisis? I solved that with my first invention** by applying simple circuit board electronic theory, in 1989 seeing how to build “Maginot Line-like” fields of lightning towers, all integrated together that would attract lightning from fully-predictable lightning storms across the southern tier States of the U.S., serial-feeding all the lightning-charged capacitances to **release into the main power grid as pure AC current**.

So the more they struggled to keep me in a box unable to move, the more my God gave me even greater and greater inventions, apparently for the purpose of shaming this world's system as the satanic~obeying & ~running system it is.

Anti-Gravity Travel on out into Outer Space? Yes, it's available but No, you cannot have it yet, because the system that has all your tax money does not want you to know **the power of my God is actually REAL**, the God of Abraham, the God who called himself **YHVH** over 7,000 times in the Bible manuscripts, and [He claims full bragging rights on Imitation Energy](#) (link to Haggai 2:8).

They stopped the lightning tower system that would have gotten Americans 50% of their electricity from the gleaning of passing lightning storms, a system I sent to the United States Department of Energy in 1989. **They turned it down? Yes, but more than that.** By my contacting them I identified myself to them as a new “independent inventor” so after that I made several patents that due to lack of funding were temporary and dropped off. I will not go into them but your lives would have been made vastly improved & better had I went on to develop them. Next thing you know, all my inventions were being turned down faster than flipping flapjack pancakes for Paul Bunyon at a church bake sale pancake supper.

Friend, the life and timeline you and your family are living now is [great for a few](#). We have many toys, electronics, computers, but you are getting what they want i.e. **everything that taxes your paycheck (\$55,000.000 hybrid vehicles just try getting one repaired \$\$\$) Why?** It looks like you are being double-dipped through your pockets to support any old war the administration wants you to send your children to fight in, such as Iraq (right now). In short, both your taxed paychecks **AND** your taxed purchases (keeping you kneedeep in crude oil or their next hi-priced fuel) are supporting wars, so a-b-c you are being multiply-charged for wars in several ways not just one. The ultimate tax levied against your family is **when your child comes home in a military plane and coffin.**

This constitutes an evil timeline that none of us can stop, a juggernaut of Death. It is a very high price to pay for computer toys and videogames. There are Bible prophecies, a Mayan prophecy, even a Native Indian legend of a “White Buffalo” {[a religion-grounded God-believing Bible-knowledgeable N.A.I.-white guy with a head as hard as a buffalo? Perhaps that, perhaps => helps the world's people find the God-Creator? conquers cancer without doctors saving him?](#) who doctors sent home to die after finding his heart beating in reverse-backwards order (L-G; 2001)?}.

All of these prophecies are coming true at the same time. Now? Yes. Many have already come true, a few are yet in the pipeline... but because the powers of Satan have been turned against us all to make sure we lack spending monies to build miracle anti-Gravity engines, solar, gravity, desalinization of the world's water for pure drinking water for crops and animals, natural World Climate Control systems (1 by Tesla, 1 by me), they leave me an empty mouthpiece for you to ridicule... & **that's OK because they ridiculed Noah.** Something more than Noah's ark is here: an entire WT organization.

They can stop my building but
they will not stop the one who is coming.
Humanity's proper timeline that started with
[Adam and Eve in a garden is about to be resumed](#) and
this one [entombed](#) <> then you can|will have all “my” engines.
Read the links on this page and get a real education.

God Blessed you to find this page.

Your choice.

Ridicule or live forever.

A word of advice: benefit yourself.

From the Bible:

[Isaiah 48:17](#)

Profit-Cost Analysis from God.

“Thus saith Jehovah, thy Redeemer, the Holy One of Israel: I am Jehovah thy God, who teacheth thee to profit, who leadeth thee by the way that thou shouldest go.” {the cost, like choosing not to have multiple sex partners.}

Listen to your neighbors, your stockbroker, your

lawyer, or take care of yourself & family.

Sayings of life trumps neighbors,

drink the river of Life.

[Revelation 21:6](#)

“And he said unto me, They are come to pass. I am the Alpha and the Omega, the beginning and the end. I will give unto him that is thirsty of the fountain of the water of life freely.” {including “flowing” electricity, more than anyone can ever use.}

What is left to pay for when energy is abundant & free?

[Isaiah told us at Chapter 55:1](#)

“Ho, every one who thirsts, come to the waters; and he who has no money, come, buy and eat! Come, buy wine and milk without money and without price.”
